

Technical skills

Programming Languages	Csharp, .Net/.Net Core, Javascript, HTML
Framework	ASP.Net, React, Angular(Kendo UI), Entity Framework, MVC, Bootstrap, CSS
Database	MongoDB, SQL
Cloud	AWS (Lamba, Cognito, EC2, Step Function, Parameter Store, SES, SQS, API Gateway, Event Bridges), Azure DevOps
Tools	Azure DevOps (CI/CD Pipelines), JIRA, Visual Studio, MS Visual Studio Code, IntelliJ IDEA, Sublime Text, Docker

Work Experience

Indus Valley Partners

Mar 2023 – Present

.Net Developer

Noida

- Worked on the ReArch version (10.0) of the Order Management System (OMS) using React and Csharp.
- Served and customized OMS to meet client requirements and deployed it across Dev, UAT, and Production environments.
- Implemented several screens that were utilized for internal use, resulting in approximately 20 percentage reduction in developers' dependency from the implementations and operations teams.
- Set up Azure pipelines for automating and continuous deployment of the product across various clients and environments.
- Developed multiple APIs for the 6.0 version, which were then integrated into screens built with JavaScript.
- Automated manual deployment processes for bug fixes by creating an OMS installer, reducing developer effort and eliminating the IT Team support for each patch/deployment.
- Deployed OMSTools through DevOps across multiple clients and environments, removing the IT dependency for log access and debugging. This enabled the development team to resolve bugs faster and expedite the rollout of fixes.

CoreMaitri

Dec 2023 – Feb 2023

Full Stack Developer

Remote

- Developed multiple APIs during the project's initial phase using service layer design pattern.
- Optimized SQL views and queries, leveraging Dot Net Entity Framework for managing database migrations; streamlined data retrieval process, reducing query response time by 25 percent.
- Led end-to-end development of the users page, incorporating features like adding, editing, and deleting users with associated email functionalities (welcome emails, reset password emails).
- Migrated the whole page's structure from old Angular framework to Kendo UI.
- Enhanced business decision-making by providing data export capabilities by implementing data exporting features to Excel and PDF files.
- Implemented ASP.Net Identity authentication service throughout the codebase.
- Initialized and integrated AWS SES mailing service for efficient email communication with users.
- Provided knowledge transfer sessions to junior developers.
- Collaborated on business application development brainstorming sessions.
- Worked closely with testing team and product owner to gather and understand project requirements.
- Managed Azure CI/CD pipelines for continuous integration and deployment.

Deloitte*.Net Developer*

Sep 2021 – Nov 2023

Gurgaon, Delhi

- Using React (version 15.6) designed web portal functionalities and coordinated with offshore development teams and senior team members to upgrade the websites of 400+ customers to catch up with growing industry standards.
- Achieved growth for different portals by developing Web Applications using MVC, Entity frameworks in ASP.Net. Also did a solo project on GoMark Architecture with .Net Core.
- Led to 12 percent improvement in GoMark project.
- Introduced new architecture that did enhance the response time for user and handled booking structure using javascript, SQL and ASP.Net.
- Initiated a proof of concept for a user management system that was subsequently deployed in the production environment.
- Authored a complete set of N-unit test cases and improved the system's efficiency by 40 percent. Although the work is still ongoing, significant progress has been made.
- Contributed to a Firm Initiative where by using Angular (version 14.0) enhanced the user experience by implementing interactive and modern-day features into the application.
